

C065 — Process narrative

Altura Infra Holdings Limited · FY 2025-26 (1 April 2025 – 31 March 2026) · Procure to Pay · Invoice validation before posting

Purpose

This narrative describes the manual validation an AP Executive performs on every vendor invoice before it is posted, and the review that evidences it.

The process

1. The invoice arrives in the AP inbox and is date-stamped and logged.
2. An AP Executive checks the invoice is addressed to the correct legal entity, that the vendor name, address, bank details and tax registration agree to the vendor master, and that it references a valid purchase order.
3. Tax treatment is confirmed — GST input credit eligibility and TDS applicability.
4. The Executive records the validation on the invoice cover sheet and passes it for review.
5. An AP Reviewer, who is not the person who keyed the invoice, inspects the validation and approves it in the workflow.
6. Only then is the invoice posted.

Where the control operates

The control is manual and preventive, operating on every invoice before posting. Its evidence is the reviewer approval recorded in the workflow and the completed cover sheet.

Segregation of duties

The reviewer cannot be the preparer. The workflow enforces this by excluding the keying user from the approval step.
