

Walkthrough record — Order to Cash

O-01 · Credit limits are approved before order release

Order to Cash — Commercial Finance — Billing & Credit · Control owner P. Sharma · Companies: Altura Infra Holdings Ltd

1. Scope of the walkthrough

This control addresses the risk that sales released to customers beyond approved credit limits (AIH/O2C/R001), supporting the accuracy and existence / occurrence assertions over customer credit limits.

Transaction traced end to end: credit limit request for NTPC Vidyut Vyapar, at Altura Infra Holdings Ltd. Walkthrough held on 18 Mar 2026; attendees P. Sharma, H. Khan (Credit Controller), A. Mehta (auditor).

2. What we saw

The control is performed by P. Sharma (Commercial Finance — Billing & Credit) each month, before the ledger closes: the team approves each new or increased customer credit limit before any order is released against it.

Step 1 — Sales requests a limit with the customer's financials. Observed and agreed to the system record.

Step 2 — Credit Control scores the customer and proposes a limit. Observed and agreed to the system record.

Step 3 — The limit is approved under the credit policy. Observed and agreed to the system record.

Step 4 — SAP credit management (UKM) blocks orders above the limit. Observed and agreed to the system record.

3. Precision

Tolerance: nil. Orders above the approved limit are blocked; limits above Rs 25 crore need CFO approval.

4. Segregation confirmed

The limit is approved by Credit Control, independent of the sales team that requested it. Confirmed by inspecting the role assignment in SAP S/4HANA (SD / FI-AR).

5. Exceptions

Any exception — an order released over the limit — is held and escalated to the Head of Commercial Finance. No exception arose on the transaction traced.

6. Conclusion

The control is implemented as described. Screenshots and the SAP audit trail for the traced transaction are retained with this record.
