

Process narrative — Order to Cash

O-03 · Revenue cut-off at period-end agrees to dispatch

Order to Cash — Commercial Finance — Billing & Credit · Control owner P. Sharma · Companies: Altura Infra Holdings Ltd

1. Purpose and scope

This control addresses the risk that revenue recorded in the wrong period or without basis (cut-off) (AIH/O2C/R003), supporting the accuracy and existence / occurrence assertions over period-end sales invoices and dispatches.

It applies to Altura Infra Holdings Ltd and is run in SAP S/4HANA (SD / FI-AR).

2. How the control works

The control is performed by P. Sharma (Commercial Finance — Billing & Credit) each month, before the ledger closes: the team agrees invoices around each period-end to the dispatch and commissioning documents.

- a) A report of invoices five days either side of period-end is run from SAP.
- b) Each invoice is agreed to the dispatch note or commissioning certificate.
- c) Invoices in the wrong period are reversed.
- d) The Credit Controller signs off the review.

3. Precision

Tolerance: every invoice above Rs 50 lakh is checked; below that, a sample of 10 per entity.

4. Who does what

The review is done by Commercial Finance, independent of the billing team. Approvals are given under the Altura delegation of authority (DoA v7, effective 1 Apr 2025).

5. Exceptions

Any exception — revenue in the wrong period — is adjusted before close.

6. Evidence

Each occurrence is evidenced by dated sign-off; the SAP audit trail and the signed documents are retained for eight years in the Altura evidence store.

Process owner: L. Fernandes (Head of Commercial Finance) · Version 3.2 · Approved 12 Apr 2026
