

Process narrative — Order to Cash

O-04 · Credit notes are held for approval once a customer's rolling monthly total passes 12 L

Order to Cash — Commercial Finance — Billing & Credit · Control owner P. Sharma · Companies: Altura Infra Holdings Ltd

1. Purpose and scope

This control addresses the risk that revenue overstated through unapproved credit notes or unaccrued rebates (AIH/O2C/R004), supporting the accuracy and existence / occurrence assertions over credit notes.

It applies to Altura Infra Holdings Ltd and is run in SAP S/4HANA (SD / FI-AR).

2. How the control works

The control is performed by P. Sharma (Commercial Finance — Billing & Credit) each month, before the ledger closes: the team holds credit notes for approval once a customer's rolling monthly total passes the set level.

- a) Credit notes are raised in SAP with a reason code.
- b) SAP totals each customer's credit notes over a rolling month.
- c) Above the set level, the credit note is held for approval.
- d) Approved credit notes are released and posted.

3. Precision

Tolerance: credit notes up to Rs 5 lakh a month per customer post directly; above that they are held for approval.

4. Who does what

Approval is given by the Credit Controller, independent of the billing team that raised the note. Approvals are given under the Altura delegation of authority (DoA v7, effective 1 Apr 2025).

5. Exceptions

Any exception — a credit note released without approval — is escalated to the Head of Commercial Finance.

6. Evidence

Each occurrence is evidenced by dated sign-off; the SAP audit trail and the signed documents are retained for eight years in the Altura evidence store.

Process owner: L. Fernandes (Head of Commercial Finance) · Version 3.2 · Approved 12 Apr 2026
