

Process narrative — Order to Cash

O-05 · Customer master changes are independently reviewed

Order to Cash — Commercial Finance — Billing & Credit · Control owner P. Sharma · Companies: Altura Infra Holdings Ltd

1. Purpose and scope

This control addresses the risk that cash receipts misapplied or customer master data manipulated (AIH/O2C/R005), supporting the accuracy and existence / occurrence assertions over customer master changes.

It applies to Altura Infra Holdings Ltd and is run in SAP S/4HANA (SD / FI-AR).

2. How the control works

The control is performed by P. Sharma (Commercial Finance — Billing & Credit) each month, before the ledger closes: the team reviews every customer master change against its supporting documents before it is activated.

- a) The requester submits the change in SAP MDG with supporting documents.
- b) Master Data checks the change against the documents.
- c) Changes to bank or credit fields are confirmed with the customer.
- d) The change is activated after approval.

3. Precision

Tolerance: nil — every change is reviewed before activation.

4. Who does what

The reviewer is independent of the sales team that requested the change. Approvals are given under the Altura delegation of authority (DoA v7, effective 1 Apr 2025).

5. Exceptions

Any exception — missing support — is held and escalated to the Credit Controller.

6. Evidence

Each occurrence is evidenced by dated sign-off; the SAP audit trail and the signed documents are retained for eight years in the Altura evidence store.

Process owner: L. Fernandes (Head of Commercial Finance) · Version 3.2 · Approved 12 Apr 2026
