

Walkthrough record — Procure to Pay

PX-04 · Procure to Pay period-end cut-off is reviewed

Procure to Pay — Shared Services — Procurement & AP · Control owner S. Iyer · Companies: Altura Infra Holdings Ltd, Altura Solar Pvt Ltd

1. Scope of the walkthrough

This control addresses the risk that Procure to Pay misstated — additions, movements or reconciliations not controlled (AIH/P2P/R001), supporting the accuracy and existence / occurrence assertions over period-end GRNs and invoices.

Transaction traced end to end: the March 2026 cut-off review, at Altura Infra Holdings Ltd. Walkthrough held on 18 Mar 2026; attendees S. Iyer, M. Joshi (AP Controller), A. Mehta (auditor).

2. What we saw

The control is performed by S. Iyer (Shared Services — Procurement & AP) each month, before the ledger closes: the team reviews goods received and invoices around each month-end to confirm they are recorded in the right period.

Step 1 — A report of GRNs and invoices five days either side of month-end is run from SAP. Observed and agreed to the system record.

Step 2 — Each item is checked to the delivery date on the goods receipt note. Observed and agreed to the system record.

Step 3 — Items in the wrong period are accrued or reversed. Observed and agreed to the system record.

Step 4 — The AP Controller signs off the cut-off review. Observed and agreed to the system record.

3. Precision

Tolerance: every item above Rs 5 lakh is checked; below that, a sample of 10 items per entity.

4. Segregation confirmed

The review is done by the AP Controller, independent of the stores team that posts goods receipts. Confirmed by inspecting the role assignment in SAP S/4HANA (MM / FI-AP).

5. Exceptions

Any exception — an item in the wrong period — is adjusted before close and reported to the Financial Controller. No exception arose on the transaction traced.

6. Conclusion

The control is implemented as described. Screenshots and the SAP audit trail for the traced transaction are retained with this record.
