

Walkthrough record — Procure to Pay

PX-05 · Procure to Pay exceptions are escalated and resolved per policy

Procure to Pay — Shared Services — Procurement & AP · Control owner S. Iyer · Companies: Altura Infra Holdings Ltd, Altura Solar Pvt Ltd

1. Scope of the walkthrough

This control addresses the risk that Procure to Pay misstated — additions, movements or reconciliations not controlled (AIH/P2P/R001), supporting the accuracy and existence / occurrence assertions over invoice and payment exceptions.

Transaction traced end to end: blocked invoice INV/100214/2600, at Altura Infra Holdings Ltd. Walkthrough held on 18 Mar 2026; attendees S. Iyer, M. Joshi (AP Controller), A. Mehta (auditor).

2. What we saw

The control is performed by S. Iyer (Shared Services — Procurement & AP) each month, before the ledger closes: the team works the blocked-invoice list daily and resolves each item under the AP exceptions policy.

Step 1 — SAP blocks invoices that fail the three-way match (MRBR list). Observed and agreed to the system record.

Step 2 — AP investigates each blocked invoice with procurement and stores. Observed and agreed to the system record.

Step 3 — Resolutions are approved by the AP Controller. Observed and agreed to the system record.

Step 4 — Unresolved items are escalated weekly. Observed and agreed to the system record.

3. Precision

Tolerance: price variance up to 2% or Rs 10,000 per line is allowed; anything above the tolerance blocks the invoice.

4. Segregation confirmed

Blocks are released by the AP Controller, independent of the AP processor who keyed the invoice. Confirmed by inspecting the role assignment in SAP S/4HANA (MM / FI-AP).

5. Exceptions

Any exception open more than 15 days is escalated to the Head of Procurement and reported monthly. No exception arose on the transaction traced.

6. Conclusion

The control is implemented as described. Screenshots and the SAP audit trail for the traced transaction are retained with this record.
