

Process flowchart — Treasury

T-01 · Payment runs approved by two authorisers

Treasury — Group Treasury · Control owner A. Verma · Companies: Altura Infra Holdings Ltd, Altura Solar Pvt Ltd, Altura Wind Pvt Ltd, Altura Smart Metering Pvt Ltd

Notes. Control points

This control addresses the risk that payments released without dual authorisation or to unverified payees (AIH/TRY/R001), supporting the accuracy and existence / occurrence assertions over payment runs.

The control is performed by A. Verma (Group Treasury) each month, before the ledger closes: the team releases each payment run in Kyriba only after two authorisers from the bank mandate have approved it.

Tolerance: nil. Every run is approved in full by two authorisers, whatever its value; runs above Rs 25 crore also need the Group CFO.

Both authorisers are independent of the analyst who prepared the run; Kyriba will not let the preparer approve their own proposal.

Any exception — a payee not on the approved master or a total that does not agree to the proposal — is held in Kyriba and escalated to the Treasury Controller before release.
