

Process narrative — Treasury

T-05 · FX deals confirmed independently of dealing

Treasury — Group Treasury · Control owner A. Verma · Companies: Altura Infra Holdings Ltd, Altura Solar Pvt Ltd, Altura Wind Pvt Ltd, Altura Smart Metering Pvt Ltd

1. Purpose and scope

This control addresses the risk that treasury exposures taken outside board-approved limits (AIH/TRY/R003), supporting the accuracy and existence / occurrence assertions over FX deals.

It applies to Altura Infra Holdings Ltd, Altura Solar Pvt Ltd, Altura Wind Pvt Ltd, Altura Smart Metering Pvt Ltd and is run in SAP S/4HANA (FI-BL) and Kyriba.

2. How the control works

The control is performed by A. Verma (Group Treasury) each month, before the ledger closes: the team confirms every FX deal with the counterparty through the back office before it is settled.

- a) The dealer books the deal in Kyriba at the time of dealing.
- b) Back office receives the counterparty confirmation directly from the bank (SWIFT MT300).
- c) Confirmation terms are matched to the booked deal.
- d) Settlement is released only for matched deals.

3. Precision

Tolerance: zero on rate, amount and value date; any difference stops settlement.

4. Who does what

Confirmations are received and matched by the back office, independent of the dealing desk. Approvals are given under the Altura delegation of authority (DoA v7, effective 1 Apr 2025).

5. Exceptions

Any exception — an unconfirmed or mismatched deal — is held and escalated to the Treasury Controller the same day.

6. Evidence

Each occurrence is evidenced by dated sign-off; the SAP audit trail and the signed documents are retained for eight years in the Altura evidence store.

Process owner: K. Raghavan (Group CFO) · Version 3.2 · Approved 12 Apr 2026
