

Process narrative — Fixed Assets

FX-01 · Capex additions are approved per the delegation of authority

Fixed Assets — Project Accounting — Fixed Assets · Control owner S. Iyer · Companies: Altura Solar Pvt Ltd, Altura Wind Pvt Ltd

1. Purpose and scope

This control addresses the risk that Fixed Assets misstated — additions, movements or reconciliations not controlled (ASO/FIX/R001), supporting the accuracy and existence / occurrence assertions over capital expenditure additions.

It applies to Altura Solar Pvt Ltd, Altura Wind Pvt Ltd and is run in SAP S/4HANA (FI-AA).

2. How the control works

The control is performed by S. Iyer (Project Accounting — Fixed Assets) each month, before the ledger closes: the team approves each capex addition in SAP against the capital budget and the delegation of authority before the order is placed.

- a) The project team raises a capex request with the budget line and business case.
- b) Project Accounting checks it against the approved capital budget.
- c) Approval is routed by value under the delegation of authority.
- d) The asset under construction is created only after approval.

3. Precision

Tolerance: nil. Every addition is approved; Board approval above Rs 50 crore, CFO above Rs 5 crore.

4. Who does what

The approver is independent of the project team that raised the request. Approvals are given under the Altura delegation of authority (DoA v7, effective 1 Apr 2025).

5. Exceptions

Any exception — spend without approval or over budget — is held and escalated to the Financial Controller.

6. Evidence

Each occurrence is evidenced by dated sign-off; the SAP audit trail and the signed documents are retained for eight years in the Altura evidence store.

Process owner: G. Pillai (Financial Controller) · Version 3.2 · Approved 12 Apr 2026
