

Walkthrough record — Fixed Assets

FX-03 · Depreciation run is reviewed against the asset register monthly

Fixed Assets — Project Accounting — Fixed Assets · Control owner S. Iyer · Companies: Altura Solar Pvt Ltd, Altura Wind Pvt Ltd

1. Scope of the walkthrough

This control addresses the risk that Fixed Assets misstated — additions, movements or reconciliations not controlled (ASO/FIX/R001), supporting the accuracy and existence / occurrence assertions over depreciation runs.

Transaction traced end to end: the March 2026 depreciation run DEP-26-103, at Altura Solar Pvt Ltd. Walkthrough held on 18 Mar 2026; attendees S. Iyer, T. Das (Asset Accounting Lead), A. Mehta (auditor).

2. What we saw

The control is performed by S. Iyer (Project Accounting — Fixed Assets) each month, before the ledger closes: the team reviews the monthly depreciation run against the asset register before the period is closed.

Step 1 — The depreciation run (AFAB) is executed in test mode. Observed and agreed to the system record.

Step 2 — The charge is compared to the register and to the prior month. Observed and agreed to the system record.

Step 3 — Movements are explained by additions and disposals. Observed and agreed to the system record.

Step 4 — The run is posted after sign-off. Observed and agreed to the system record.

3. Precision

Tolerance: month-on-month movement above 5% or Rs 25 lakh must be explained.

4. Segregation confirmed

The review is done by the Financial Controller, independent of the asset accountant who runs depreciation. Confirmed by inspecting the role assignment in SAP S/4HANA (FI-AA).

5. Exceptions

Any exception — an unexplained movement — is held and the run is not posted until it is resolved. No exception arose on the transaction traced.

6. Conclusion

The control is implemented as described. Screenshots and the SAP audit trail for the traced transaction are retained with this record.
