

Walkthrough record — Fixed Assets

FX-05 · Physical verification results are reconciled to the fixed asset register

Fixed Assets — Project Accounting — Fixed Assets · Control owner S. Iyer · Companies: Altura Solar Pvt Ltd, Altura Wind Pvt Ltd

1. Scope of the walkthrough

This control addresses the risk that Fixed Assets misstated — additions, movements or reconciliations not controlled (ASO/FIX/R001), supporting the accuracy and existence / occurrence assertions over physical verification results.

Transaction traced end to end: the Bhadla site verification of 20 Mar 2026, at Altura Solar Pvt Ltd. Walkthrough held on 18 Mar 2026; attendees S. Iyer, T. Das (Asset Accounting Lead), A. Mehta (auditor).

2. What we saw

The control is performed by S. Iyer (Project Accounting — Fixed Assets) each month, before the ledger closes: the team reconciles the results of the physical verification to the fixed asset register and clears every difference.

Step 1 — Sites count assets against the register extract. Observed and agreed to the system record.

Step 2 — Counts are tagged found, not found or not on register. Observed and agreed to the system record.

Step 3 — Differences are investigated with the site. Observed and agreed to the system record.

Step 4 — Adjustments are approved and posted. Observed and agreed to the system record.

3. Precision

Tolerance: nil on assets not found; every difference is cleared.

4. Segregation confirmed

The verification team is independent of the site custodians. Confirmed by inspecting the role assignment in SAP S/4HANA (FI-AA).

5. Exceptions

Any exception — an asset not found — is held for investigation and escalated to the Financial Controller. No exception arose on the transaction traced.

6. Conclusion

The control is implemented as described. Screenshots and the SAP audit trail for the traced transaction are retained with this record.
