

Walkthrough record — IT General Controls

G-02 · User access granted via approved request

IT General Controls — Group IT — SAP Basis & Security · Control owner V. Menon · Companies: Altura Infra Holdings Ltd

1. Scope of the walkthrough

This control addresses the risk that unauthorised or excessive access to financial systems (AIH/ITG/R001), supporting the accuracy and existence / occurrence assertions over user access requests.

Transaction traced end to end: GRC request REQ-2026-08812, at Altura Infra Holdings Ltd. Walkthrough held on 18 Mar 2026; attendees V. Menon, J. Mathew (IT Compliance Lead), A. Mehta (auditor).

2. What we saw

The control is performed by V. Menon (Group IT — SAP Basis & Security) on every transaction, as it is processed: the team grants SAP access only through an approved request in SAP GRC Access Control.

Step 1 — The user's manager raises the request in GRC. Observed and agreed to the system record.

Step 2 — GRC checks the request against the conflict rule set. Observed and agreed to the system record.

Step 3 — The role owner approves. Observed and agreed to the system record.

Step 4 — GRC provisions the role automatically. Observed and agreed to the system record.

3. Precision

Tolerance: zero — access cannot be provisioned without an approved request.

4. Segregation confirmed

Role owners are independent of the requesters; GRC blocks self-approval. Confirmed by inspecting the role assignment in SAP S/4HANA.

5. Exceptions

Any exception — a conflict — is held for the role owner and escalated to IT Compliance. No exception arose on the transaction traced.

6. Conclusion

The control is implemented as described. Screenshots and the SAP audit trail for the traced transaction are retained with this record.
