

Walkthrough record — IT General Controls

G-05 · Emergency changes reviewed post-implementation

IT General Controls — Group IT — SAP Basis & Security · Control owner V. Menon · Companies: Altura Infra Holdings Ltd

1. Scope of the walkthrough

This control addresses the risk that unauthorised or untested changes reach production (AIH/ITG/R002), supporting the accuracy and existence / occurrence assertions over emergency changes.

Transaction traced end to end: emergency change CHG0031377, at Altura Infra Holdings Ltd. Walkthrough held on 18 Mar 2026; attendees V. Menon, J. Mathew (IT Compliance Lead), A. Mehta (auditor).

2. What we saw

The control is performed by V. Menon (Group IT — SAP Basis & Security) each month, before the ledger closes: the team reviews every emergency change after it is implemented and confirms it was needed and approved.

Step 1 — The emergency change is raised in ServiceNow with a reason. Observed and agreed to the system record.

Step 2 — Firefighter access is used and logged. Observed and agreed to the system record.

Step 3 — The change is reviewed within 2 business days. Observed and agreed to the system record.

Step 4 — The review is signed off by the change manager. Observed and agreed to the system record.

3. Precision

Tolerance: every emergency change is reviewed within 2 business days.

4. Segregation confirmed

The review is done by the change manager, independent of the person who made the change. Confirmed by inspecting the role assignment in SAP S/4HANA.

5. Exceptions

Any exception — a change not reviewed in time — is escalated to the Group CIO. No exception arose on the transaction traced.

6. Conclusion

The control is implemented as described. Screenshots and the SAP audit trail for the traced transaction are retained with this record.
