

Process narrative — Order to Cash

O-01 · Credit limits are approved before order release

Order to Cash — Commercial Finance — Billing & Credit · Control owner P. Sharma · Companies: Altura Infra Holdings Ltd

1. Purpose and scope

This control addresses the risk that sales released to customers beyond approved credit limits (AIH/O2C/R001), supporting the accuracy and existence / occurrence assertions over customer credit limits.

It applies to Altura Infra Holdings Ltd and is run in SAP S/4HANA (SD / FI-AR).

2. How the control works

The control is performed by P. Sharma (Commercial Finance — Billing & Credit) each month, before the ledger closes: the team approves each new or increased customer credit limit before any order is released against it.

- a) Sales requests a limit with the customer's financials.
- b) Credit Control scores the customer and proposes a limit.
- c) The limit is approved under the credit policy.
- d) SAP credit management (UKM) blocks orders above the limit.

3. Precision

Tolerance: nil. Orders above the approved limit are blocked; limits above Rs 25 crore need CFO approval.

4. Who does what

The limit is approved by Credit Control, independent of the sales team that requested it. Approvals are given under the Altura delegation of authority (DoA v7, effective 1 Apr 2025).

5. Exceptions

Any exception — an order released over the limit — is held and escalated to the Head of Commercial Finance.

6. Evidence

Each occurrence is evidenced by dated sign-off; the SAP audit trail and the signed documents are retained for eight years in the Altura evidence store.

Process owner: L. Fernandes (Head of Commercial Finance) · Version 3.2 · Approved 12 Apr 2026
