

Walkthrough record — Procure to Pay

PX-02 · Procure to Pay balances are reconciled to the ledger monthly

Procure to Pay — Shared Services — Procurement & AP · Control owner S. Iyer · Companies: Altura Infra Holdings Ltd, Altura Solar Pvt Ltd

1. Scope of the walkthrough

This control addresses the risk that Procure to Pay misstated — additions, movements or reconciliations not controlled (AIH/P2P/R001), supporting the accuracy and existence / occurrence assertions over GR/IR and AP sub-ledger balances.

Transaction traced end to end: the March 2026 AP reconciliation, at Altura Infra Holdings Ltd. Walkthrough held on 18 Mar 2026; attendees S. Iyer, M. Joshi (AP Controller), A. Mehta (auditor).

2. What we saw

The control is performed by S. Iyer (Shared Services — Procurement & AP) on every transaction, as it is processed: the team reconciles the AP sub-ledger and the GR/IR clearing account to the general ledger automatically at each month-end.

Step 1 — The month-end job compares the AP sub-ledger to the AP control account. Observed and agreed to the system record.

Step 2 — GR/IR open items are aged and listed by vendor. Observed and agreed to the system record.

Step 3 — Differences are posted to the reconciliation report. Observed and agreed to the system record.

Step 4 — The AP Controller signs off the report. Observed and agreed to the system record.

3. Precision

Tolerance: Rs 50,000 per vendor on GR/IR; any difference above the tolerance is investigated.

4. Segregation confirmed

The job is configured by IT under change control, independent of AP staff who post invoices. Confirmed by inspecting the role assignment in SAP S/4HANA (MM / FI-AP).

5. Exceptions

Any exception above tolerance is held on the report and escalated to the Financial Controller with an owner and a date. No exception arose on the transaction traced.

6. Conclusion

The control is implemented as described. Screenshots and the SAP audit trail for the traced transaction are retained with this record.
