

Walkthrough record — Procure to Pay

PX-03 · Procure to Pay master data changes are independently reviewed

Procure to Pay — Shared Services — Procurement & AP · Control owner S. Iyer · Companies: Altura Infra Holdings Ltd, Altura Solar Pvt Ltd

1. Scope of the walkthrough

This control addresses the risk that Procure to Pay misstated — additions, movements or reconciliations not controlled (AIH/P2P/R001), supporting the accuracy and existence / occurrence assertions over vendor master data changes.

Transaction traced end to end: vendor change request VMC-2026-0311, at Altura Infra Holdings Ltd. Walkthrough held on 18 Mar 2026; attendees S. Iyer, M. Joshi (AP Controller), A. Mehta (auditor).

2. What we saw

The control is performed by S. Iyer (Shared Services — Procurement & AP) each month, before the ledger closes: the team reviews every vendor master change against its supporting documents in SAP MDG before the change is activated.

Step 1 — The requester submits the change in SAP MDG with supporting documents. Observed and agreed to the system record.

Step 2 — The Master Data team checks the change against the documents. Observed and agreed to the system record.

Step 3 — Bank detail changes are called back on a number held on file. Observed and agreed to the system record.

Step 4 — The change is activated after approval. Observed and agreed to the system record.

3. Precision

Tolerance: nil. Every change is reviewed; no change is activated without approval.

4. Segregation confirmed

The reviewer is independent of the requester and has no access to post invoices or release payments. Confirmed by inspecting the role assignment in SAP S/4HANA (MM / FI-AP).

5. Exceptions

Any exception — missing support or a failed call-back — is held and escalated to the AP Controller. No exception arose on the transaction traced.

6. Conclusion

The control is implemented as described. Screenshots and the SAP audit trail for the traced transaction are retained with this record.
