

Process flowchart — Treasury

T-02 · Bank reconciliations reviewed monthly

Treasury — Group Treasury · Control owner A. Verma · Companies: Altura Infra Holdings Ltd, Altura Solar Pvt Ltd, Altura Wind Pvt Ltd, Altura Smart Metering Pvt Ltd

Notes. Control points

This control addresses the risk that bank balances misstated through unreconciled differences (AIH/TRY/R002), supporting the accuracy and existence / occurrence assertions over bank reconciliations.

The control is performed by A. Verma (Group Treasury) on every transaction, as it is processed: the team matches bank statement lines to the ledger automatically in SAP (FEBAN) and lists every unmatched line for review.

Matching tolerance: zero on amount and two days on value date; anything outside the tolerance stays open for review.

The matching rules are maintained by IT under change control, independent of the Treasury team that reviews the open items.

Any exception older than 30 days is escalated to the Group CFO with an explanation and an owner.
