

Process narrative — Treasury

T-04 · Borrowing within board-approved limits

Treasury — Group Treasury · Control owner A. Verma · Companies: Altura Infra Holdings Ltd, Altura Solar Pvt Ltd, Altura Wind Pvt Ltd, Altura Smart Metering Pvt Ltd

1. Purpose and scope

This control addresses the risk that treasury exposures taken outside board-approved limits (AIH/TRY/R003), supporting the accuracy and existence / occurrence assertions over drawdowns and new borrowings.

It applies to Altura Infra Holdings Ltd, Altura Solar Pvt Ltd, Altura Wind Pvt Ltd, Altura Smart Metering Pvt Ltd and is run in SAP S/4HANA (FI-BL) and Kyriba.

2. How the control works

The control is performed by A. Verma (Group Treasury) each month, before the ledger closes: the team checks every drawdown against the board-approved borrowing limits before the facility agreement is signed.

- a) Treasury prepares a drawdown note with the facility, amount and tenor.
- b) The note is checked against the board-approved borrowing limits and covenant headroom.
- c) The Group CFO approves the drawdown note; amounts above Rs 500 crore go to the Board.
- d) The drawdown is booked in SAP Treasury (TRM) from the signed note.

3. Precision

Tolerance: nil above the board-approved limit — no drawdown may take total borrowings over it, and covenant headroom must stay above 10%.

4. Who does what

The drawdown note is approved by the Group CFO, independent of the dealer who negotiated the facility. Approvals are given under the Altura delegation of authority (DoA v7, effective 1 Apr 2025).

5. Exceptions

Any exception — a drawdown that would breach a limit — is held and escalated to the Board before signature.

6. Evidence

Each occurrence is evidenced by dated sign-off; the SAP audit trail and the signed documents are retained for eight years in the Altura evidence store.

Process owner: K. Raghavan (Group CFO) · Version 3.2 · Approved 12 Apr 2026
