

SOP-P2P-004 — Accounts Payable: invoice processing

Altura Infra Holdings Limited · approved 1 April 2025 · owner: Head of Accounts Payable

6.1 Scope

This procedure applies to all PO-based vendor invoices received by the shared service centre for every entity in the group.

6.2 Three-way match

Every PO-based invoice shall be matched to its purchase order and goods receipt note before release for payment. The match is performed by the system at the point of posting and shall not be performed manually.

6.3 Tolerances

A price or quantity variance of up to 5%, capped at INR 25,000 per invoice line, may post without intervention. A variance above either limit blocks the invoice and raises an exception to the buyer named on the purchase order.

6.4 Overrides

An override of a blocked invoice requires the approval of the Head of Accounts Payable and a documented reason. Overrides are reported monthly to the Financial Controller.

6.5 Segregation of duties

No user shall hold both the invoice posting role (AP_POST) and the payment release role (TR_RELEASE). Conflicts are blocked at the point of role assignment and reviewed quarterly.
