Altura Infra Holdings Limited

LEGEND, NOTES AND BASIS OF PREPARATION

LEGEND

- Wholly owned and fully consolidated.
- Part of the equity sits outside the group — a non-controlling interest, an associate or a joint arrangement.
- The registrant. The only company that carries the filing obligation and the only one that names an exchange.
- “**x% owned**” — the direct holding of the immediate parent.

“**effective y%**” — the share reaching the listed parent through the chain, being the product of every direct holding between the two.

“**n companies beneath**” — companies held below this one at any depth, drawn on the page named for that platform.

CONSOLIDATION

- Full consolidation** — the group controls the company and takes 100% of its results, showing the non-controlling interest separately.

Joint operation — the group takes its share of the assets, liabilities and results line by line.

Equity method — associates and joint ventures. One line in the consolidated accounts; never inside group revenue or group assets, which is why their percentage-of-group columns are blank.

Branch — included in parent — a registered branch with no separate legal personality. It is tested with its parent, not on its own.

NOTES

1. Only Altura Infra Holdings Limited is listed. Every other company on this register is privately held and consolidates into the parent's financial statements; none has securities registered on any exchange. SOX 404 applies to the group through the parent's NYSE-listed ADS programme.

2. Consolidation follows control, not ownership. Altura Transmission Pvt Ltd is consolidated notwithstanding the 26% non-controlling interest held by a state transmission utility. Altura Water Utilities Pvt Ltd is consolidated on the basis of control under its concession agreement; the remaining 49% is held by the municipal corporation. The 50% joint ventures are *not* consolidated, because a half share is not control.

3. Effective ownership is the product of the direct holdings down the chain. Altura Smart Metering Pvt Ltd is wholly owned by Altura Transmission Pvt Ltd, which is itself 74% owned — so 74% reaches the group.

4. Non-controlling interest is shown only for consolidated subsidiaries. An associate has other shareholders, but it has no non-controlling interest, and the column is left blank rather than filled with the inverse of the holding.

5. **This register reflects the statutory registers as at 30 September 2025.** Any company incorporated or acquired after that date — including any SPV formed in the second half of FY26 — will appear in the consolidated trial balance for the year but is not shown here. The registers are maintained by hand; the trial balance is not.

6. Companies disposed of during the period are retained on the register with their disposal date, and are excluded from the consolidated figures from that date. Dormant companies are shown; they carry no transactions and are out of scope for testing.

7. Standalone revenue, profit before tax and total assets are stated in INR crore, translated at closing rates for companies whose functional currency is not the rupee. Percentages of group revenue and group assets are computed on consolidated companies only.

8. Scoping bases are stated for every company on the register, in scope or out. A scope without stated reasons cannot be reviewed.

Altura Infra Holdings Limited

REGISTER OF COMPANIES

All 254 companies on the register, in entity-ID order. The full register — 39 columns including registration numbers, tax registrations, statutory auditors, allocated materiality and scoping bases — is issued alongside this chart as a workbook.
