

Walkthrough record — Order to Cash

O-02 · Sales invoices priced from the approved price master

Order to Cash — Commercial Finance — Billing & Credit · Control owner P. Sharma · Companies: Altura Infra Holdings Ltd

1. Scope of the walkthrough

This control addresses the risk that customers billed at incorrect prices or terms (AIH/O2C/R002), supporting the accuracy and existence / occurrence assertions over sales invoice prices.

Transaction traced end to end: invoice 90012844, at Altura Infra Holdings Ltd. Walkthrough held on 18 Mar 2026; attendees P. Sharma, H. Khan (Credit Controller), A. Mehta (auditor).

2. What we saw

The control is performed by P. Sharma (Commercial Finance — Billing & Credit) on every transaction, as it is processed: the team prices each sales invoice automatically from the approved price master in SAP SD.

Step 1 — Prices are maintained in the price master (VK11) after approval. Observed and agreed to the system record.

Step 2 — Billing (VF01) reads the price from the master. Observed and agreed to the system record.

Step 3 — Manual price overrides are blocked by configuration. Observed and agreed to the system record.

Step 4 — Price master changes are logged. Observed and agreed to the system record.

3. Precision

Tolerance: zero — manual price changes on the invoice are not allowed.

4. Segregation confirmed

Price master changes are approved by Commercial Finance, independent of the billing team. Confirmed by inspecting the role assignment in SAP S/4HANA (SD / FI-AR).

5. Exceptions

Any exception — an invoice priced off-master — is held and escalated to the Credit Controller. No exception arose on the transaction traced.

6. Conclusion

The control is implemented as described. Screenshots and the SAP audit trail for the traced transaction are retained with this record.
