

Walkthrough record — Order to Cash

O-03 · Revenue cut-off at period-end agrees to dispatch

Order to Cash — Commercial Finance — Billing & Credit · Control owner P. Sharma · Companies: Altura Infra Holdings Ltd

1. Scope of the walkthrough

This control addresses the risk that revenue recorded in the wrong period or without basis (cut-off) (AIH/O2C/R003), supporting the accuracy and existence / occurrence assertions over period-end sales invoices and dispatches.

Transaction traced end to end: the March 2026 cut-off review, at Altura Infra Holdings Ltd. Walkthrough held on 18 Mar 2026; attendees P. Sharma, H. Khan (Credit Controller), A. Mehta (auditor).

2. What we saw

The control is performed by P. Sharma (Commercial Finance — Billing & Credit) each month, before the ledger closes: the team agrees invoices around each period-end to the dispatch and commissioning documents.

Step 1 — A report of invoices five days either side of period-end is run from SAP. Observed and agreed to the system record.

Step 2 — Each invoice is agreed to the dispatch note or commissioning certificate. Observed and agreed to the system record.

Step 3 — Invoices in the wrong period are reversed. Observed and agreed to the system record.

Step 4 — The Credit Controller signs off the review. Observed and agreed to the system record.

3. Precision

Tolerance: every invoice above Rs 50 lakh is checked; below that, a sample of 10 per entity.

4. Segregation confirmed

The review is done by Commercial Finance, independent of the billing team. Confirmed by inspecting the role assignment in SAP S/4HANA (SD / FI-AR).

5. Exceptions

Any exception — revenue in the wrong period — is adjusted before close. No exception arose on the transaction traced.

6. Conclusion

The control is implemented as described. Screenshots and the SAP audit trail for the traced transaction are retained with this record.
