

Walkthrough record — Order to Cash

O-04 · Credit notes are held for approval once a customer's rolling monthly total passes ₹2 L

Order to Cash — Commercial Finance — Billing & Credit · Control owner P. Sharma · Companies: Altura Infra Holdings Ltd

1. Scope of the walkthrough

This control addresses the risk that revenue overstated through unapproved credit notes or unaccrued rebates (AIH/O2C/R004), supporting the accuracy and existence / occurrence assertions over credit notes.

Transaction traced end to end: credit note CN-2026-0412, at Altura Infra Holdings Ltd. Walkthrough held on 18 Mar 2026; attendees P. Sharma, H. Khan (Credit Controller), A. Mehta (auditor).

2. What we saw

The control is performed by P. Sharma (Commercial Finance — Billing & Credit) each month, before the ledger closes: the team holds credit notes for approval once a customer's rolling monthly total passes the set level.

Step 1 — Credit notes are raised in SAP with a reason code. Observed and agreed to the system record.

Step 2 — SAP totals each customer's credit notes over a rolling month. Observed and agreed to the system record.

Step 3 — Above the set level, the credit note is held for approval. Observed and agreed to the system record.

Step 4 — Approved credit notes are released and posted. Observed and agreed to the system record.

3. Precision

Tolerance: credit notes up to Rs 5 lakh a month per customer post directly; above that they are held for approval.

4. Segregation confirmed

Approval is given by the Credit Controller, independent of the billing team that raised the note. Confirmed by inspecting the role assignment in SAP S/4HANA (SD / FI-AR).

5. Exceptions

Any exception — a credit note released without approval — is escalated to the Head of Commercial Finance. No exception arose on the transaction traced.

6. Conclusion

The control is implemented as described. Screenshots and the SAP audit trail for the traced transaction are retained with this record.
