

Process flowchart — Procure to Pay

PX-01 · Procure to Pay transactions are approved before processing

Procure to Pay — Shared Services — Procurement & AP · Control owner S. Iyer · Companies: Altura Infra Holdings Ltd, Altura Solar Pvt Ltd

Notes. Control points

This control addresses the risk that Procure to Pay misstated — additions, movements or reconciliations not controlled (AIH/ P2P/R001), supporting the accuracy and existence / occurrence assertions over purchase requisitions and orders.

The control is performed by S. Iyer (Shared Services — Procurement & AP) each month, before the ledger closes: the team approves each purchase order in SAP against the delegation of authority before it is released to the vendor.

Tolerance: nil. Every order is approved before release; the approver level steps up at Rs 10 lakh, Rs 1 crore and Rs 10 crore.

The approver is independent of the requester; SAP release codes are not assigned to anyone who can create orders.

Any exception — an order released without approval or above the approver's level — is held and escalated to the Head of Procurement.
