

Process narrative — Procure to Pay

PX-05 · Procure to Pay exceptions are escalated and resolved per policy

Procure to Pay — Shared Services — Procurement & AP · Control owner S. Iyer · Companies: Altura Infra Holdings Ltd, Altura Solar Pvt Ltd

1. Purpose and scope

This control addresses the risk that Procure to Pay misstated — additions, movements or reconciliations not controlled (AIH/ P2P/R001), supporting the accuracy and existence / occurrence assertions over invoice and payment exceptions.

It applies to Altura Infra Holdings Ltd, Altura Solar Pvt Ltd and is run in SAP S/4HANA (MM / FI-AP).

2. How the control works

The control is performed by S. Iyer (Shared Services — Procurement & AP) each month, before the ledger closes: the team works the blocked-invoice list daily and resolves each item under the AP exceptions policy.

- a) SAP blocks invoices that fail the three-way match (MRBR list).
- b) AP investigates each blocked invoice with procurement and stores.
- c) Resolutions are approved by the AP Controller.
- d) Unresolved items are escalated weekly.

3. Precision

Tolerance: price variance up to 2% or Rs 10,000 per line is allowed; anything above the tolerance blocks the invoice.

4. Who does what

Blocks are released by the AP Controller, independent of the AP processor who keyed the invoice. Approvals are given under the Altura delegation of authority (DoA v7, effective 1 Apr 2025).

5. Exceptions

Any exception open more than 15 days is escalated to the Head of Procurement and reported monthly.

6. Evidence

Each occurrence is evidenced by dated sign-off; the SAP audit trail and the signed documents are retained for eight years in the Altura evidence store.

Process owner: R. Kulkarni (Head of Procurement) · Version 3.2 · Approved 12 Apr 2026
