

Process narrative — Treasury

T-03 · New payee setup independently verified

Treasury — Group Treasury · Control owner A. Verma · Companies: Altura Infra Holdings Ltd, Altura Solar Pvt Ltd, Altura Wind Pvt Ltd, Altura Smart Metering Pvt Ltd

1. Purpose and scope

This control addresses the risk that payments released without dual authorisation or to unverified payees (AIH/TRY/R001), supporting the accuracy and existence / occurrence assertions over new payee set-ups.

It applies to Altura Infra Holdings Ltd, Altura Solar Pvt Ltd, Altura Wind Pvt Ltd, Altura Smart Metering Pvt Ltd and is run in SAP S/4HANA (FI-BL) and Kyriba.

2. How the control works

The control is performed by A. Verma (Group Treasury) each month, before the ledger closes: the team verifies each new payee and each bank-detail change by calling back the payee on a number taken from an independent source.

- a) The requester raises the payee request in SAP MDG with supporting documents.
- b) The Master Data team calls the payee back on the number held on file, not the one on the request.
- c) Bank details are confirmed against a cancelled cheque or bank letter.
- d) The payee is activated only after the call-back is recorded.

3. Precision

Tolerance: nil. No payee is activated without a completed call-back, whatever the first payment value.

4. Who does what

The call-back is made by the Master Data team, independent of the requester and of anyone who can release payments. Approvals are given under the Altura delegation of authority (DoA v7, effective 1 Apr 2025).

5. Exceptions

Any exception — a call-back that fails or details that differ — is held, the payee stays blocked, and the case is escalated to the Treasury Controller.

6. Evidence

Each occurrence is evidenced by dated sign-off; the SAP audit trail and the signed documents are retained for eight years in the Altura evidence store.

Process owner: K. Raghavan (Group CFO) · Version 3.2 · Approved 12 Apr 2026
