PX-02 · Procure to Pay balances are reconciled to the ledger monthly

Procure to Pay — Shared Services — Procurement & AP · Control owner S. Iyer · Companies: Altura Infra Holdings Ltd, Altura Solar Pvt Ltd

1. What the configuration controls

This control addresses the risk that Procure to Pay misstated — additions, movements or reconciliations not controlled (AIH/ P2P/R001), supporting the accuracy and existence / occurrence assertions over GR/IR and AP sub-ledger balances.

The control is performed by S. Iyer (Shared Services — Procurement & AP) on every transaction, as it is processed: the team reconciles the AP sub-ledger and the GR/IR clearing account to the general ledger automatically at each month-end.

Setting	Value
Job	ZAP_RECON_ME (month-end)
Accounts	211000 AP control · 191100 GR/IR
Vendor-level check	On
Report	ZFI_GRIR_AGE
Output	PDF to AP Controller

2. Precision

Tolerance: Rs 50,000 per vendor on GR/IR; any difference above the tolerance is investigated.

3. Segregation

The job is configured by IT under change control, independent of AP staff who post invoices.

4. Exceptions

Any exception above tolerance is held on the report and escalated to the Financial Controller with an owner and a date.

5. Change history

Configuration changes go through ServiceNow change control; the SAP table-change audit trail (SCU3) is retained.
