

Process narrative — Procure to Pay

PX-04 · Procure to Pay period-end cut-off is reviewed

Procure to Pay — Shared Services — Procurement & AP · Control owner S. Iyer · Companies: Altura Infra Holdings Ltd, Altura Solar Pvt Ltd

1. Purpose and scope

This control addresses the risk that Procure to Pay misstated — additions, movements or reconciliations not controlled (AIH/ P2P/R001), supporting the accuracy and existence / occurrence assertions over period-end GRNs and invoices.

It applies to Altura Infra Holdings Ltd, Altura Solar Pvt Ltd and is run in SAP S/4HANA (MM / FI-AP).

2. How the control works

The control is performed by S. Iyer (Shared Services — Procurement & AP) each month, before the ledger closes: the team reviews goods received and invoices around each month-end to confirm they are recorded in the right period.

- a) A report of GRNs and invoices five days either side of month-end is run from SAP.
- b) Each item is checked to the delivery date on the goods receipt note.
- c) Items in the wrong period are accrued or reversed.
- d) The AP Controller signs off the cut-off review.

3. Precision

Tolerance: every item above Rs 5 lakh is checked; below that, a sample of 10 items per entity.

4. Who does what

The review is done by the AP Controller, independent of the stores team that posts goods receipts. Approvals are given under the Altura delegation of authority (DoA v7, effective 1 Apr 2025).

5. Exceptions

Any exception — an item in the wrong period — is adjusted before close and reported to the Financial Controller.

6. Evidence

Each occurrence is evidenced by dated sign-off; the SAP audit trail and the signed documents are retained for eight years in the Altura evidence store.

Process owner: R. Kulkarni (Head of Procurement) · Version 3.2 · Approved 12 Apr 2026
