

Process narrative — Treasury

T-01 · Payment runs approved by two authorisers

Treasury — Group Treasury · Control owner A. Verma · Companies: Altura Infra Holdings Ltd, Altura Solar Pvt Ltd, Altura Wind Pvt Ltd, Altura Smart Metering Pvt Ltd

1. Purpose and scope

This control addresses the risk that payments released without dual authorisation or to unverified payees (AIH/TRY/R001), supporting the accuracy and existence / occurrence assertions over payment runs.

It applies to Altura Infra Holdings Ltd, Altura Solar Pvt Ltd, Altura Wind Pvt Ltd, Altura Smart Metering Pvt Ltd and is run in SAP S/4HANA (FI-BL) and Kyriba.

2. How the control works

The control is performed by A. Verma (Group Treasury) each month, before the ledger closes: the team releases each payment run in Kyriba only after two authorisers from the bank mandate have approved it.

- a) Treasury analyst prepares the payment proposal from SAP (F110) and uploads it to Kyriba.
- b) First authoriser checks the run total and payee list against the approved invoices.
- c) Second authoriser approves; Kyriba blocks release until both approvals are recorded.
- d) The released run is reconciled to the bank acknowledgement the same day.

3. Precision

Tolerance: nil. Every run is approved in full by two authorisers, whatever its value; runs above Rs 25 crore also need the Group CFO.

4. Who does what

Both authorisers are independent of the analyst who prepared the run; Kyriba will not let the preparer approve their own proposal. Approvals are given under the Altura delegation of authority (DoA v7, effective 1 Apr 2025).

5. Exceptions

Any exception — a payee not on the approved master or a total that does not agree to the proposal — is held in Kyriba and escalated to the Treasury Controller before release.

6. Evidence

Each occurrence is evidenced by dated sign-off; the SAP audit trail and the signed documents are retained for eight years in the Altura evidence store.

Process owner: K. Raghavan (Group CFO) · Version 3.2 · Approved 12 Apr 2026
