

Walkthrough record — Treasury

T-05 · FX deals confirmed independently of dealing

Treasury — Group Treasury · Control owner A. Verma · Companies: Altura Infra Holdings Ltd, Altura Solar Pvt Ltd, Altura Wind Pvt Ltd, Altura Smart Metering Pvt Ltd

1. Scope of the walkthrough

This control addresses the risk that treasury exposures taken outside board-approved limits (AIH/TRY/R003), supporting the accuracy and existence / occurrence assertions over FX deals.

Transaction traced end to end: USD/INR forward FX-2026-0233, at Altura Infra Holdings Ltd. Walkthrough held on 18 Mar 2026; attendees A. Verma, N. Bhatt (Treasury Controller), A. Mehta (auditor).

2. What we saw

The control is performed by A. Verma (Group Treasury) each month, before the ledger closes: the team confirms every FX deal with the counterparty through the back office before it is settled.

Step 1 — The dealer books the deal in Kyriba at the time of dealing. Observed and agreed to the system record.

Step 2 — Back office receives the counterparty confirmation directly from the bank (SWIFT MT300). Observed and agreed to the system record.

Step 3 — Confirmation terms are matched to the booked deal. Observed and agreed to the system record.

Step 4 — Settlement is released only for matched deals. Observed and agreed to the system record.

3. Precision

Tolerance: zero on rate, amount and value date; any difference stops settlement.

4. Segregation confirmed

Confirmations are received and matched by the back office, independent of the dealing desk. Confirmed by inspecting the role assignment in SAP S/4HANA (FI-BL).

5. Exceptions

Any exception — an unconfirmed or mismatched deal — is held and escalated to the Treasury Controller the same day. No exception arose on the transaction traced.

6. Conclusion

The control is implemented as described. Screenshots and the SAP audit trail for the traced transaction are retained with this record.
