

Altura Infra Holdings Limited

LEGAL ENTITY STRUCTURE CHART — CONSOLIDATED GROUP

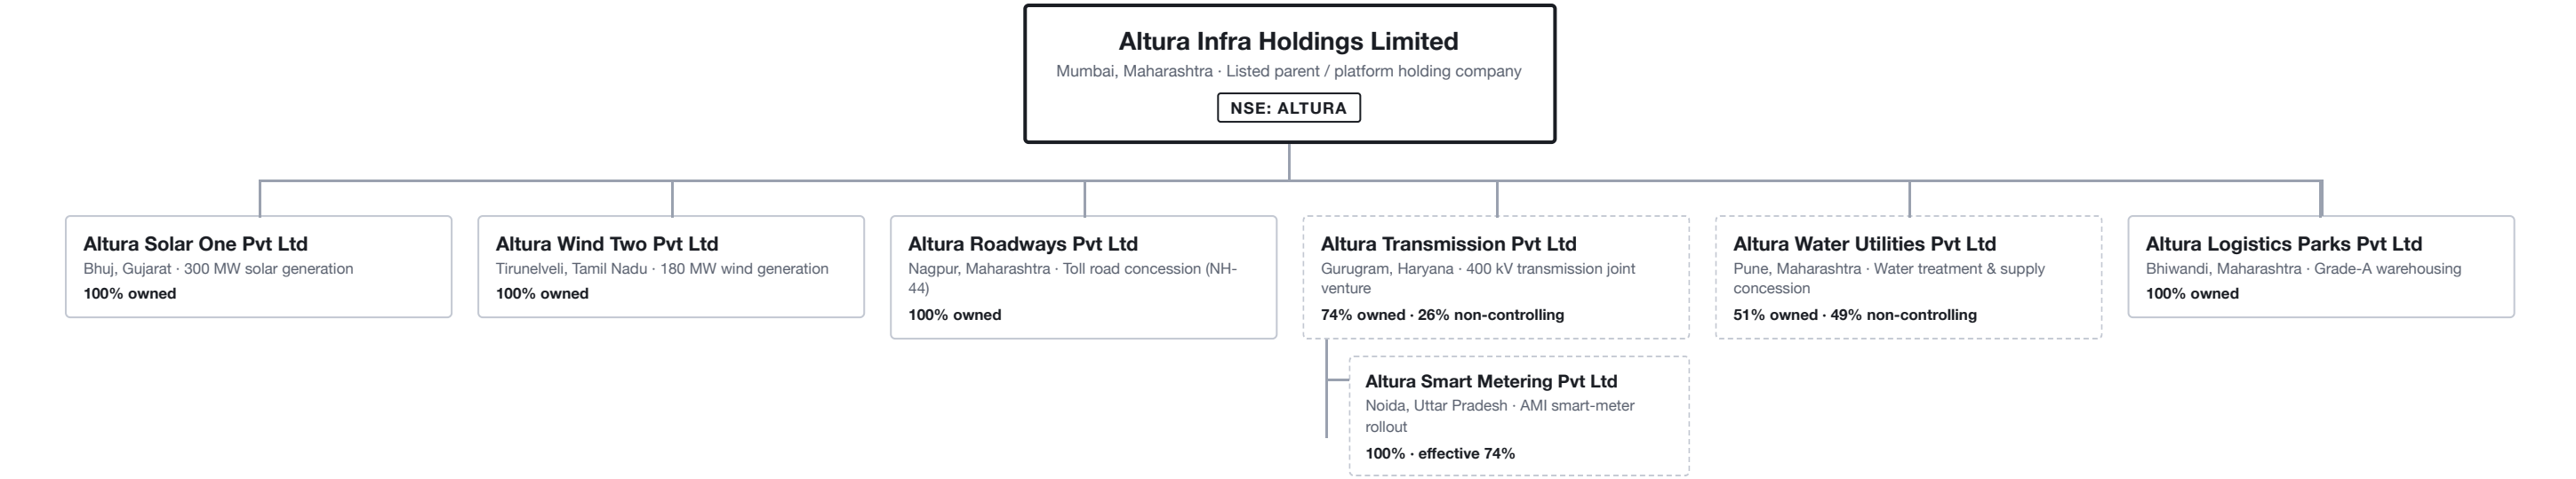

Listing NSE & BSE, India (ALTURA) · NYSE ADS programme

Registrant SEC — Form 20-F filer (foreign private issuer)

Last revised 30 September 2025

Entities 8 across three levels

Prepared for FY26 SOX 404 scoping (year ending 31 March 2026)

NOTES

- Only Altura Infra Holdings Limited is listed. The seven subsidiaries are privately held and consolidate into the parent's financial statements; none has securities registered on any exchange. SOX 404 applies to the group through the parent's NYSE-listed ADS programme.
- Percentages on the level-three company are the direct holding of its immediate parent; "effective" is the share reaching the listed parent through the chain. Altura Smart Metering Pvt Ltd is wholly owned by Altura Transmission Pvt Ltd, which is itself 74% owned — so 74% reaches the group.
- Altura Transmission Pvt Ltd is consolidated notwithstanding the 26% non-controlling interest held by a state transmission utility. Altura Water Utilities Pvt Ltd is consolidated on the basis of control under the concession agreement; the remaining 49% is held by the municipal corporation.
- Dashed outline denotes an entity in which part of the equity is held outside the group.
- This chart reflects the statutory registers as at 30 September 2025.** Any company incorporated or acquired after that date — including an SPV formed in the second half of FY26 — will appear in the consolidated trial balance for the year but is not shown here. The registers are maintained by hand; the trial balance is not.
- Dormant entities and branch registrations are excluded. No entity was disposed of during the period.
